

Driving Smarter Admissions, Stronger Margins, and Better Resident Outcomes

Meet your New SNF Care Transitions & Referral Support Platform

Cascala is a clinically responsible, AI-enabled decision support platform built for post-acute care. We help Skilled Nursing Facilities (SNFs) and their referral partners accelerate admissions, align staffing with acuity, and reduce costly readmissions.

By delivering real-time risk insights, staffing guidance, and intake automation, we help SNFs accelerate admissions, reduce referral leakage, and strengthen financial performance.

Backed by strategic investors like Omega Healthcare Investors, Cascala is rapidly expanding across the U.S. to support operators in delivering both better care and stronger financial results.

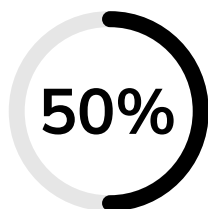

Omega funds the future of senior care *They're investing in Cascala Health*

Cascala and Omega Healthcare Investors are partnering to unlock operational efficiency, higher margins, and better care transitions at scale. Together, we are building a smarter future for post-acute care.

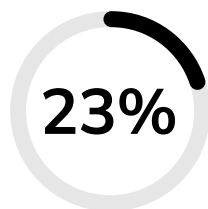

As an Omega partner and operator, you have priority access to Cascala's solutions, including preferred pricing. Omega's reach, combined with Cascala's AI-driven intelligence, creates a powerful opportunity to help skilled nursing facilities:

- Improve occupancy and revenue days.
- Optimize staffing costs against census and acuity.
- Reduce readmission penalties and strengthen hospital relationships.
- Drive sustainable, scalable margin growth across Omega's portfolio.

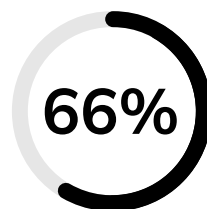

The Challenge We Solve

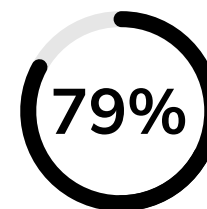

SNF intake coordinators report incomplete referrals, leading to delays & lost admissions.

SNF residents are readmitted to hospitals within 30 days.

Higher per hour for agency than in-house nursing staff.

National SNF occupancy averages, with top operators reaching 88%.

These challenges compound margin pressures, staffing shortages, and the need to maintain strong referral relationships. Cascala helps operators work smarter at every transition of care.

How We Support SNFs

- **Accelerated Intake & Referral Packet Auto-Review**
Decision Support – AI summaries reduce referral leakage and speed admissions.
- **Referral Decision Support:** Assessment of patient suitability for facility based on configurable clinical, administrative, and payer criteria important to your organization.
- **Accurate Risk Identification** – Surfaces infection control, dialysis, wound care, and many other clinical risks requiring care team awareness.
- **Right-Sized Staffing** – Aligns clinical teams with real-time acuity.
- **Specialized Care Readiness** – Identifies complex care needs before admission.
- **Streamlined Communication** – Improves relationships with referral partners.
- **Optimized Bed Utilization** – Helps drive referral decisions aligned with Drives census growth and financial stability.

What We Do

Our modular platform embeds directly into existing workflows and EMRs, streamlining how SNFs manage referrals, admissions, and care transitions.

Clarity™

Data-curation and AI-summarization engine.

- ✓ Real-time referral intake parsing
- ✓ AI discharge summaries & handoff reports
- ✓ Cross-Facility Patient 360°

Continuity™

Longitudinal intelligence and network connectivity layer.

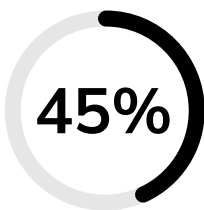

- ✓ Risk flagging at transition points
- ✓ Follow-up tracking & care alerts
- ✓ Cross-stakeholder coordination

Copilot™

Unified insights & analytics suite.

- ✓ Network referral dashboards
- ✓ Predictive risk forecasts
- ✓ Financial & operational impact modeling

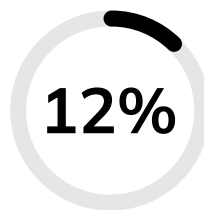

Proven Impact:

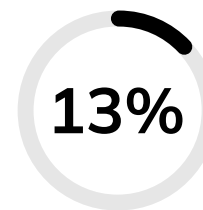

faster admission decision times

reduction in agency staff hours within 6 months

increase in new referrals from hospital partners

fewer avoidable readmissions among high-risk patients

Frequently Asked Questions

Q: How does Cascala integrate with Omega's facilities?

A: Cascala embeds into existing EMRs and care platforms, minimizing toggles and manual re-entry.

Q: How do you ensure clinical responsibility?

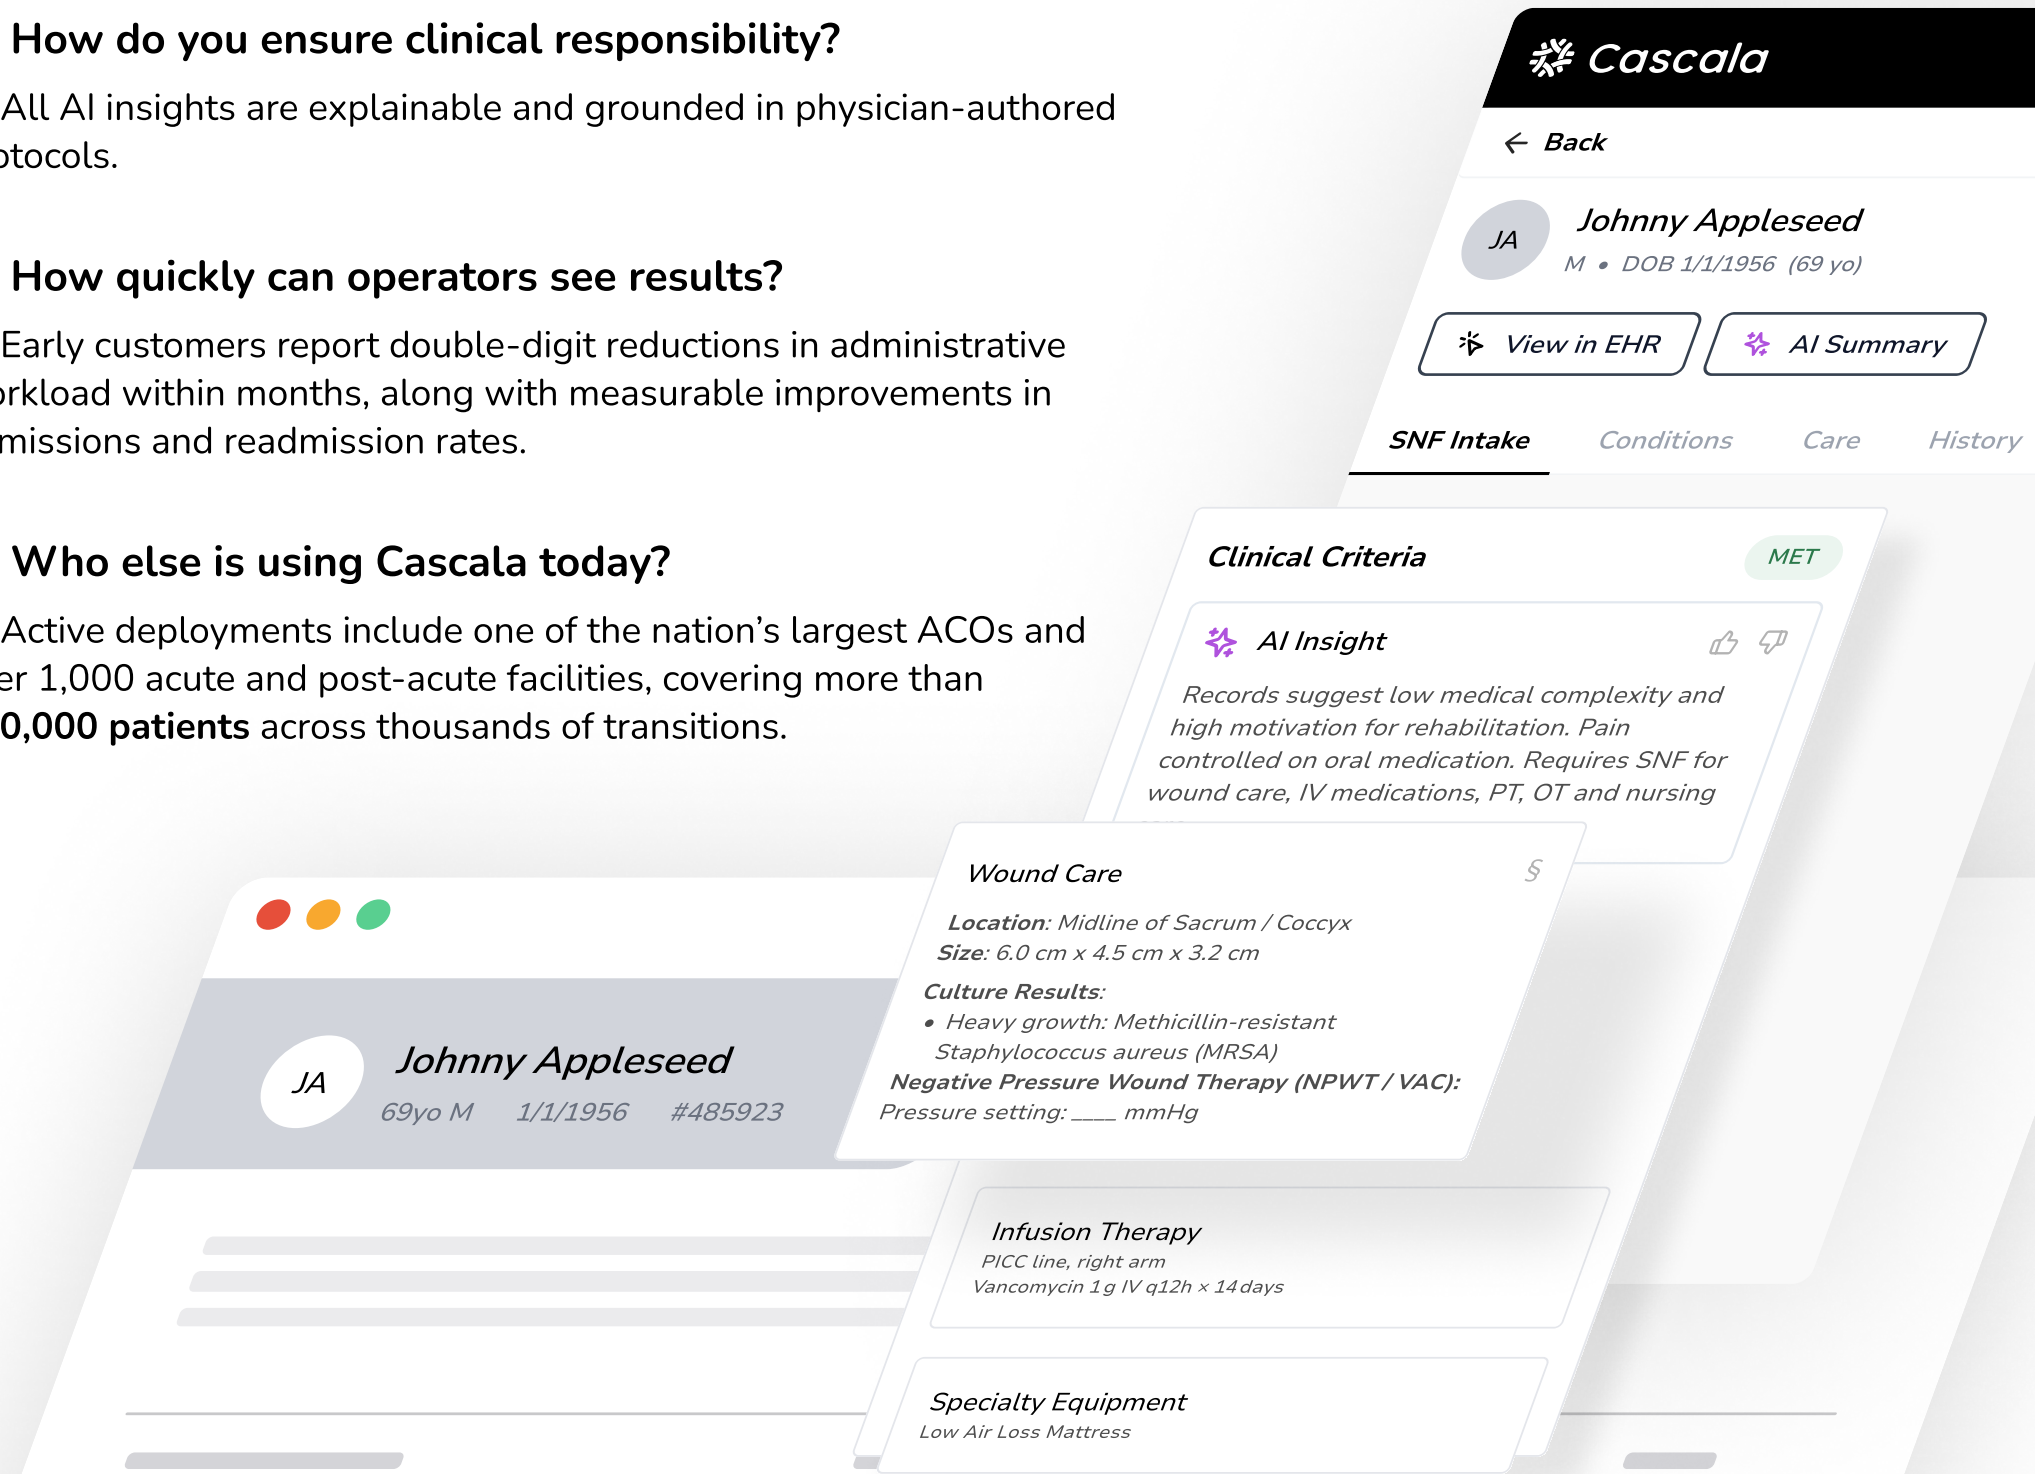

A: All AI insights are explainable and grounded in physician-authored protocols.

Q: How quickly can operators see results?

A: Early customers report double-digit reductions in administrative workload within months, along with measurable improvements in admissions and readmission rates.

Q: Who else is using Cascala today?

A: Active deployments include one of the nation's largest ACOs and over 1,000 acute and post-acute facilities, covering more than **300,000 patients** across thousands of transitions.
